

TECHNICAL DATA SHEET

SK1SSP

Manual device for ultrasonic cutting and welding for composites

► DESCRIPTION

Portable SSP model (SSP 3006 - 20 KHz) allows simple and flexible cutting and welding of composite materials. It can cut wood fibers, glass fibers, carbon and aramid fibers with high quality and cauterization.

This device is also suitable for technical textiles, plastic films, woven and non-woven textile.

Cutting UD carbon - PEEK

Cutting carbon prepreg

Advantages

- Cauterization
- No raveling
- Diminution by 50% of cutting forces compared to conventional blades
- Life improvement of blades

Cutting capacities for composites

PRODUCTS	MATERIALS
Wood fibers Aramid fibers Carbon fibers Glass fibers	Dry (up to 25mm) Prepreg (up to 25mm) Mid-cured (up to 8mm)

SK1SSP

Manual device for ultrasonic cutting and welding for composites

► ULTRASONIC WELDING

Our model allows welding and assembly operations on composite and thermoplastic materials (PEEK, PA, PEI...).

Welding up to 25 folds. Our SSP 3006 model is perfect for pre-positioning the folds before manipulation.

Pre-positioning UD carbon - PEEK

Handgun

ATERIALS	PRODUCTS
UD Prepreg Powdery woven	Fibers Thermoplastics (PEEK, PA, PEI ...)

Manual device for ultrasonic cutting and welding for composites

► TECHNICAL DATA

Weight: about 7 Kg
Dimensions: 360 x 270 x 130
Power supply: 230 V mono 50 / 60 Hz
Link: RS232

European connectors Conform to CE norms.

► GENERAL CHARACTERISTICS

Numerical power supply, numerical INTEL PLL;
Automatic optimum frequency research;
Numerical frequency maintenance in real time;
Series communication link JBUS;
Welding time programming Constant and settable amplitude whatever are:

- Pressure conditions
- Used power
- Electric power fluctuations

Defects PNP signals

Security dedicated to power over intensity (time of response <1us)
Technology based on IGBT 4th generation^{SEP}
Rate > 90 %

► EQUIPMENT AND ACCESSORIES

Cutting gun

Welding gun
