

TECHNICAL DATA SHEET

SK2BB427-1

Fiberglass breather for high temperature applications

► DESCRIPTION

SK2BB427-1 is a non-woven fiberglass breather which is more convenient at usage than woven fiberglass breather due to the high drapability of material. This product is designed for high temperature thermoset and thermoplastic resins. It makes an easier transition for the vacuum bag and in any radius. Only one layer of breather provides good breathing at high temperatures until 427°C.

The product is incombustible and has excellent insulating properties and good vibration stability.

This product is used in various manufacturing processes of parts made of composite materials.

► TECHNICAL DATA

Raw material:	Glass fibres
Weight:	610g/m ²
Maximum use temperature	427°C
Color:	White

► SIZE

Width	Length
1,15m	50m

Shelf life: not limited.

Storage conditions: it is recommended to store at temperature from -20°C until +30°C in the original packing.

► NOTE

Other widths are available on special order.
