

# TECHNICAL DATA SHEET

## SK2PP230-2

### Peel ply

#### ► DESCRIPTION

SK2PP230-2 is high temperature tightly woven nylon fabric coated with a silicone release agent. It provides very good release after curing as silicone prevents the fabric from bonding to the laminate surface. It will provide easy release from most resin systems.

All silicone coated peel plies have the potential to transfer. This product is used in various manufacturing processes of parts made of composite materials.

#### ► TECHNICAL DATA

Fiber type:	Nylon (Polyamide)
Coating:	Silicone
Color:	White / Yellow / Light blue
Weight:	60g/m <sup>2</sup>
Maximum use temperature	230°C
Extractable materials:	<0,2%
Tensile strength MD:	>280N/cm
Tensile strength TD:	>280N/cm

#### ► SIZE

Thickness	Width	Length
85µm	1520mm	100m

Shelf life: unlimited

Storage conditions: it is recommended to store at temperatures between +10°C and +30°C in the original packing.

#### ► NOTE

Other width or special sizes available on request.
