

«VIK-COMPOSITE» GmbH Introduces a new product

Our new scissors for trimming edges and borders of impregnated laminated fabrics: SK3CUT-11

- Special, curved scissors made in Germany are perfectly designed for trimming edges and borders of impregnated laminated fabrics made of carbon and glass fibers;
- Scissors are available in two versions: SK3CUT11S16 small size (160 mm) with curved blades and SK3CUT11S18 large size (185 mm) with curved blades and curved handles;
- The curved shape of the scissors allows taking your hand away from the surface of the cut, thus protecting your fingers from injury against sharp edges and fibers;
- The upper blade is micro-serrated, which prevents the blades sliding while cutting.
- Scissors are polished and chrome-plated to ensure protection from corrosion and solvents;
- Scissors material: forged carbon steel C60 (hardness HRC 58,0) subject to grinding.
