**SK2PP170-4**

**Polyamide high visible colour peel ply**

## ► DESCRIPTION

SK2PP170-4 is a highly visible fluorescent yellow polyamide peel ply with good performance when used with both polyester and epoxy resins. Due to high visibility the risk of peel ply being left on the part is reduced. There is no release agent or silicon in the fabric so there is no contamination. The fabric is scoured and heat set to remove most contaminants and reduce shrinkage.

This product is used in various manufacturing processes of parts made of composite materials.
