

TECHNICAL DATA SHEET

SK2PP230-4 Tight woven peel ply

► DESCRIPTION

SK2PP230-4 is a tight woven nylon peel ply with silicon coating. It provides good release property and is widely used in molding process of wind energy, marine, aerospace. All coated peel plies have the potential to transfer of the part.

This product is used in various manufacturing processes of parts made of composite materials.

► TECHNICAL DATA

Fiber type: Nylon (Polyamide)
Color: Light blue/ light green
Weight: 62 g/m²
Maximum use temperature: 232°C

► SIZE

Thickness	Width	Length
100µm	1520mm	100m

Shelf life: unlimited

Storage conditions: it is recommended to store at temperatures between +10°C and +30°C in the original packing.

► NOTE

Other width or special sizes available on request.
Other colors available on request.
