

VIK-COMPOSITE GmbH

We are exhibiting regionally for the first time!

**Boschwerk Schwäbisch
Gmünd – 28 & 29
September**

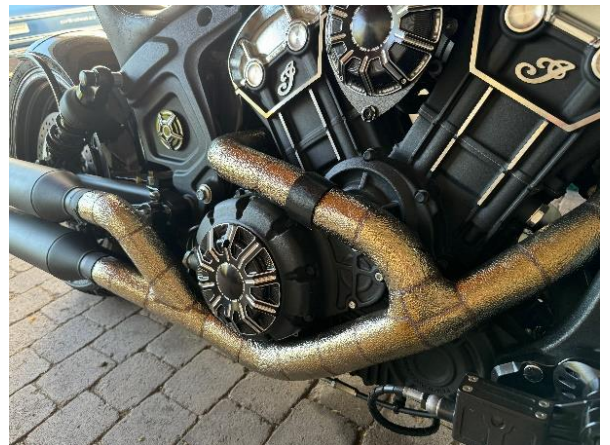

Visit us at **our Booth B21**

Make Ostwürttemberg 2024

Experience our success in **Small Series Production**, **Prototyping** and **Thermal management**.

Customised integral insulation: exhaust system components, manifolds, turbochargers, catalytic converters and silencers - we have been optimizing the heat radiation of exhaust systems in the engine compartment for renowned customers from the car, truck and motorsport industries for over 15 years.

Core expertise in welding: from simple components to complex welded assemblies. With state-of-the-art equipment and highly qualified specialists, we offer TIG / MAG welding for stainless steel, steel, aluminium, titanium and Inconel

3D cutting: our 6-axis 3D water jet cutting system enables distortion-free cutting of tubes and plates - without the use of heat.
