

► DESCRIPTION

Numerous preventive maintenance tasks for leak detections can be handled quickly and efficiently with the SONAPHONE Pocket. Lower your energy costs and increase your operational safety with the most compact testing device of the SONAPHONE series.

Advantages of device:

- Find leaks and save energy
- Compact design
- Easy to use
- Extensive accessories for a wide range of applications

The ultrasonic testing device is used for:

- Vacuum leak localization by creation of the vacuum bag,
- Leak detection with compressed air, gas and vacuum systems,
- Providing evidence of partial electrical discharges where there is insulation damage,
- Functional testing of steam traps and valves
- Tightness testing of unpressurised systems.

The compact testing device is designed to fit in any pocket. However, its robust construction means it is also appropriate for harsh industrial environments.

The SONAPHONE Pocket is supplemented by extensive accessories in the form of airborne and structure-borne sound probes. You will receive the appropriate probe for your

application from our product range, which you can attach to the device with just one simple movement.

You do not need much time or expensive training in order to perform the test procedure. The testing device makes the ultrasonic signals audible and shows them on a digital display at the same time. The SONAPHONE Pocket – easy to handle and very effective.

This product is used in various manufacturing processes of parts made of polymer composite materials.

TECHNICAL DATA SHEET

SK3VLD-1 Vacuum leak detector

► OVERVIEW

SK3VLD-1BASIC / SONAPHONE POCKET – Basic Set

Consisting of: SONAPHONE Pocket, noise protected stereo headphones with coiled cable, transport case, lanyard, batteries, user documentation.

SK3VLD-1LDS / SONAPHONE POCKET – Leak Detection Set

Consisting of: airborne sound probe L 50, directional tube with tip, acoustic horn for airborne sound probe L 50, leak tags (25 pcs.), noise protected stereo headphones with coiled cable, transport case, lanyard, batteries, user documentation.

► PRESENTATION OF COMPACT ULTRASONIC TESTING DEVICE FOR PREVENTIVE MAINTENANCE WITH ACCESSORIES

Airborne probe for quick and easy leak detection on compressed air, gas and vacuum systems

At 85 x 130 x 30 mm the SONAPHONE Pocket fits into any jacket pocket

Slot for airborne and structure-borne probes – perfect for different applications

Digital display of the ultrasonic level – rapid assessment of condition of machines and systems

Gathering the maximum value at a glance

Robust construction – ideal for harsh testing environments

► TECHNICAL DATA

Transmission frequency:
Functionality:

40 kHz, bandwidth +/- 2 kHz
Detection of ultrasonic signals: Makes the ultrasonic signals audible and shows them on a digital display;
Auto-power-off-function

Display:
Connections:

LC-Display with illuminated background
For different ultrasonic probes
Stereo jack socket

Power supply:
Operating time:
Operating temperature:
Storage temperature:
Protection class:
Accessories of Basic Set:

2 AA batteries or accumulators
Approx. 24 h
-10 °C ... +60°C
-20 °C ... +60°C
Device: IP54; Probe: IP20
Headphones, carrying strap, carrying case, instruction manual

► SIZE

Weight of devise	Size of the devise
280 g	85 x 130 x 30 mm

SK3VLD-1 Vacuum leak detector

► OPTIONAL ACCESSORIES

Name	Application	Picture
SK3VLD-1L50SET Leak detection set: airborne sound probe L50, directional tube with tip, acoustic horn, 25 leak tags	detection of vacuum leakage	
SK3VLD-1L50 Air-borne probe L 50 for SONAPHONE Pocket	leak detection, proof of seal failures	
SK3VLD-1L51 Contact Probe L 51 for SONAPHONE Pocket	inspection of valves, slide and safety valves	
SK3VLD-1L52 Contact Probe L 52 for SONAPHONE Pocket	testing of steam traps, inspection of rotating machines	
SK3VLD-1L53 Flexible air-borne sound probe L 53 for SONAPHONE Pocket	leak detection at places, difficult to access	
SK3VLD-1L55 Parabolic Dish SONOSPOT for SONAPHONE Pocket	precise detection of leaks or partial discharges over long distances	
SK3VLD-1L54 Spherical Transmitter SONOSPHERE for SONAPHONE T. Accessories: stand, magnetic and suction holder	leak testing of cabins and containers (in combination with SONAPHONE T and SONAPHONE Pocket)	
SK3VLD-1TV2 SONAPHONE T Adjustable Ultrasonic Transmitter	Reliable Detection of Leaks
