

TECHNICAL DATA SHEET

SK2PP230-3

Peel ply

► DESCRIPTION

SK2PP230-3 is high temperature tightly woven nylon fabric leaving a fine textured surface. This peel ply is scoured and heat set to remove contaminates and reduce shrinkage.

This product is used in various manufacturing processes of parts made of composite materials.

► TECHNICAL DATA

Fiber type:	Nylon (Polyamide)
Color:	White
Weight:	60g/m ²
Maximum use temperature:	230°C
Extractable materials:	<0,2%
Tensile strength MD:	>280N/cm
Tensile strength TD:	>280N/cm

► SIZE

Thickness	Width	Length
110µm	1520mm	100m

Shelf life: unlimited

Storage conditions: it is recommended to store at temperatures between +10°C and +30°C in the original packing.

► NOTE

Other width or special sizes available on request.

Other colors available on request.
