

Our SK2AT204-6 heat-resistant, high strength polyester tape covered on one side with temperature-resistant, acrylic-based adhesive is developed for applications where the use of silicon adhesive is unacceptable. SK2AT204-6 can be used in ovens and autoclaves for masking-of, holding down vacuum bagging materials and thermocouple wires. The tape removes easily after the cure.

TECHNICAL DATA	VALUE
Carrier type	Polyester
Adhesive type	Acrylic
Color	Green
Elongation at break	>90%
Recommended use temperature	204°C
Maximum use temperature*	230°C

**SIZE**

Total thickness	65 µm
Carrier thickness	25 µm
Adhesive thickness	40 µm
Width	25 mm and 50 mm as standard
Length	66 m

**STORAGE**

Shelf life: minimum 12 months in original packaging  
 Storage: store in a cool, dry place in the original packaging, protected from direct sunlight and other heat sources

**NOTES**

\*Maximum use temperature depends on specific process conditions. Verification testing is recommended prior to serial production.  
 Custom sizes available upon request
