

# SK2RIM000-11

## Clamping ring for resin inlet tubes in injection process

The clamping ring is developed specially for securing of connection between core barbed part of the fitting SK2RIM000-11 with feeding silicone reinforced tube SK2RIM260-2 in injection processes by resin transfer under pressure into the mold.

TECHNICAL DATA	VALUE
Material	Galvanised steel
Clamping area	Ø 11 - 17mm
Thread length	25mm

### STORAGE

Shelf life: unlimited.

Storage conditions: store at 10–30°C in original packaging

### NOTES

MOQ 50 pce
