

SK2VV270-18

Standard high temperature vacuum hose in the roll

This vacuum hose is a platinum cured silicone hose manufactured to the highest standard which has been developed specially for high temperature applications in autoclaves and ovens, rated to a temperature of 270°C. The internal steel spring prevents collapse under vacuum and pressure.

The hose is extremely durable and long lasting, very flexible and user friendly. The hose has NO silicone loss meaning no contamination worries.

This product is used in various manufacturing processes of parts made of composite.

TECHNICAL DATA	VALUE
Material type of hose	Silicone
Material type of inner conduits	Steel spring
Hose color	Red
Length of the roll	25 m
Internal hose diameter	3/8 inch
Outer hose diameter	3/4 inch
Maximum use temperature*	270°C
Max. autoclave pressure*	10 bar

STORAGE

It is recommended to store at temperature from +10°C until +30°C in the original packing.

NOTES

Recommended maintenance interval 1000 hours based on operating temperatures up to 180°C when used with our connections.

* Maximum use pressure and temperature should be determined under your actual process conditions.
