

Resin distribution tape is composed of a warp-knitted structure and monofilament-created nooses which are used as flow canal. The tape supports the vacuum infusion process. It can be used on the entry side as resin infusion aid and on the exit side as vacuum canal.

The tape is easy to handle and to attach, adapts to curved component contours and leaves no appreciable marks.

This product is used in various manufacturing processes of parts made of composite materials.

TECHNICAL DATA	VALUE
Material type:	PES
Color	White
Maximum use temperature	180°C
Melting point	220°C

THICKNESS	WIDTH	LENGTH
3,5mm	20mm	25m
3,5mm	43mm	25m

STORAGE

Shelf life: not limited
 Storage conditions: it is recommended to store at temperature from -20°C till + 30°C in the original packing.

NOTES

MOQ is 1 roll.
