

SK2VV399-4

Super high temperature cartridge plug

This super high temperature cartridge plug is made of stainless-steel for maximum durability and manufactured to the highest standard which has been developed specially for high temperature applications in autoclaves and ovens, rated to a temperature of 399°C.

Plug is male threaded connector. It has a threaded male cone end on one side, designed for a precise, seal-less connection with SK2VV399-1 vacuum hose. It can also be used in combination with our socket connectors SK2VV399-3 as well as seal-less connection.

The cartridge plug is extremely durable, long lasting and user friendly.

Our sockets, plugs, hoses, and valves enable a seal-less connection even at extremely high temperatures, thanks to a 60° cone face with parallel threads – no additional sealing required.

TECHNICAL DATA	VALUE
Material	Stainless steel
Color	Iron grey
Maximum use temperature	399°C

SIZE

Connection to hose SK2VV399-1	3/8" BSP male with 60° conical seal inside
Connection to socket SK2VV399-3	60° external sealing cone with thread

Technical values are provided to the best of our knowledge and are based on data considered reliable. Users are responsible for verifying suitability and assume all associated risks.

SK2VV399-4

Super high temperature cartridge plug

STORAGE

Shelf life: unlimited.
 Storage conditions: it is recommended to store at temperature between +10°C and +30°C in original packing

NOTES

Maximum use pressure and temperature should be determined under your actual process conditions.
 All end fittings are 100% vacuum tested after assembly.
 Recommended maintenance interval 1000hours when using with our connections.
