

SK2AT205-4 features a high-temperature, high-tensile-strength polyester film backing coated with high-tack, pressure-sensitive silicone adhesive. This tape excels in heavy-duty hold-down tasks requiring superior adhesion, such as in ovens and autoclaves. It provides robust performance for masking and chemical milling protection with exceptional chemical resistance. The tape releases cleanly and easily after curing, leaving no residue

TECHNICAL DATA	VALUE
Carrier type	Polyester
Adhesive type	Silicone
Color	Green
Elongation at break	100%
Maximum use temperature*	205°C

SIZE	
Total thickness	100 µm
Carrier thickness	30 µm
Adhesive thickness	70 µm
Width	25 mm and 50 mm as standard
Length	66 m

STORAGE

Shelf life: minimum 12 months in original packaging
 Storage: store in a cool, dry place in the original packaging, protected from direct sunlight and other heat sources

NOTES

*Maximum use temperature depends on specific process conditions. Verification testing is recommended prior to serial production.
 Custom sizes available upon request
