

SK2AT260-4 is a PTFE tape with silicone adhesive. The product will release from most resin systems. It is ideal for use on tooling blocks and all areas where high elongation and release is needed. It forms to critical contours and mould surfaces while offering multiple releases or may be used to cover multiple detail mold seams. SK2AT260-4 provides a semi-permanent release on cured tooling rubber and pressure intensifiers and mandrels.

TECHNICAL DATA	VALUE
Carrier type	PTFE
Adhesive type	Silicone (standard version) Acrylic (A version)
Color	Brown
Elongation at break	≥ 140%
Maximum use temperature*	260°C

SIZE

Total thickness	88 µm
Carrier thickness	50 µm
Adhesive thickness	38 µm
Width	25 mm, 50 mm
Length	33 m

STORAGE

Shelf life: minimum 12 months in original packaging
Storage: store in a cool, dry place in the original packaging, protected from direct sunlight and other heat sources

NOTES

*Maximum use temperature depends on specific process conditions. Verification testing is recommended prior to serial production.
Custom sizes available upon request
Max. width: 600 mm
