

This heavy weight non-woven polyester breather is used for high pressure cycles. It offers good elongation and avoids any sharp radius for vacuum bag protection.

This product is used in various manufacturing processes of parts made of composite materials.

TECHNICAL DATA	VALUE
Material type:	Polyester
Weight:	340 g/m ²
Recommended curing pressure*	< 7 Bar
Maximum use temperature	205°C
Color:	White
Fibre thickness:	28dtex

THICKNESS	WIDTH	LENGTH
5-6 mm	1500mm	50m

STORAGE

Shelf life: not limited.
Storage conditions: it is recommended to store at temperature from -20°C until +30°C in the original packing.

NOTES

Other widths are available on special order.
Max. width is 3 m.
* Maximum use pressure and temperature should be determined under your actual process conditions.
