

# SK2PP190-3

## High tenacity heat set polyamide peel ply

High tenacity polyamide peel ply, which could be used with epoxy, vinylester and polyester resins in the processes till 205°C. This peel ply is used to impart textured surface to the molded component to allow secondary operations such as painting. This product is used in various manufacturing processes of parts made of composite materials.

TECHNICAL DATA	VALUE
Material type	Nylon (Polyamide)
Color	Off-white
Stripes	No
Surface weight	90 g/m <sup>2</sup>
Weave style	Plain
Maximum use temperature*	205°C

### SIZE

Thickness	180 µm
Width	1640 mm
Length	100 m

### STORAGE

Shelf life: unlimited.  
Storage conditions: it is recommended to store at temperatures between -20°C and +30°C in original packing

### NOTES

Peel plies are treated in order to remove all pollutant products (like silicones for example) which could be found on the laminate.

Hot knife slitting of the 1 master is possible upon request.  
1 roll is a minimum order quantity.

\* Maximum use temperature should be determined in actual process conditions. The maximum use temperature depends on the duration at maximum temperature and is process specific, we recommend testing prior to use.
