

SK2PP220-2

Robust medium weight polyamide peel ply

SK2PP220-2 is a high-quality polyamide peel ply of average surface weight with red stripes visible before and after curing, that reduce the risk to be left on the part surface. This peel ply can be used for infusion, autoclave or hand molding. Using of peel plies reduce or eliminate the need for sanding or abrading of composite laminate. This peel ply could be used with epoxy, polyester and vinylester resins in the processes till 232°C.

This product is used in various manufacturing processes of parts made of composite materials.

TECHNICAL DATA	VALUE
Material type	Nylon (Polyamide)
Color	White
Stripes	Red
Weave style	Plain
Surface weight	95 g/m ²
Recommended use temperature	220°C
Maximum use temperature*	232°C

SIZE

Thickness	130 µm
Width	1500 mm
Length	100 m

STORAGE

Shelf life: unlimited.
Storage conditions: it is recommended to store at temperatures between -20°C and +30°C in original packing

NOTES

Other weights or special sizes available on request. Peel ply can be supplied with width varies from 25mm until 3000 mm.
* Maximum use temperature should be determined in actual process conditions. The maximum use temperature depends on the duration at maximum temperature and is process specific, we recommend testing prior to use.
