

SK2PP230-3

High temperature lightweight polyamide peel ply

SK2PP230-3 is high temperature tightly woven nylon fabric leaving a fine textured surface. This peel ply is scoured and heat set to remove contaminates and reduce shrinkage. This product is used in various manufacturing processes of parts made of composite materials.

TECHNICAL DATA	VALUE
Material type	Nylon (Polyamide)
Color	White
Surface weight	60 g/m ²
Maximum use temperature*	230°C

SIZE	
Thickness	110 µm
Width	1520 mm
Length	100 m

STORAGE

Shelf life: unlimited.
Storage conditions: it is recommended to store at temperatures between +10°C and +30°C in original packing

NOTES

Other width or special sizes available on request.
Other colors available on request.
* Maximum use temperature should be determined in actual process conditions. The maximum use temperature depends on the duration at maximum temperature and is process specific, we recommend testing prior to use.
